

Hungarian Language V.

-FOG-MA241

The course covers the most important Hungarian dentistry-related terminology students need for their studies and especially practices. Dentistry vocabulary and typical sentences of dentist-patient dialogues are taught. Apart from the terminology, the most important Hungarian grammatical issues are regularly revised. All contact hours focus on speaking and communication: the language is practiced with the help of dentist-patient role-plays, listening comprehension tasks and authentic case presentations. The study material has been compiled by the teachers of our Group especially for third year dentistry students. The study material can be downloaded from Coospace at the beginning of the semester. Vocabulary lists are frequently sent to the students in Quizlet with authentic pronunciation. Students are required to join their Dentistry class in Quizlet where their progress concerning mastering the dentistry-related vocabulary can be checked by the teacher. The course ends with a five-grade practical mark.

Feedback from our students:

“Thank you for providing a great semester for us”

“A magyaróra tökéletes volt.”

Hungarian Language VI.

-FOG-MA 242
